

MK-IXL 5-inch Hinged Vacuum Shroud

Fits these popular grinders:
 Dewalt, Bosch, Metabo, Makita, and Milwaukee

MK-IXL 5-inch Hinged Vacuum Shroud

The MK Diamond IXL 5" Hinged Vacuum Shroud is designed for concrete and surface grinding dust control. The shroud is made from an "abrasive resistant" plastic to prevent wear from the grinding process. The hinged nose shroud easily flips to the side for grinding against walls and edges. The use of a shroud prolongs the life of the tool by preventing abrasive dust and debris from entering the motor.

The MK-IXL 5" hinged vacuum shroud is easy to install on popular grinders using the included adapters.

- Developed for all grinding and polishing operations
- The front nose easily swings away for edge work
- Increases cup wheel life by removing abrasive dust
- Dust control reduces clean up time and crystalline silica dust exposure
- Designed for use when cleaning, leveling spots, removing epoxies, urethanes, paint and other coatings

Installs easily on most 4", 4-1/2" and 5" grinders.

Easily attaches to vacuums or dust extractors

Designed for 4" - 5" diamond cup wheels

MK-IXL 5-inch Full Vacuum Shroud

Fits these popular grinders:
Dewalt, Bosch, Metabo, Makita, and Milwaukee

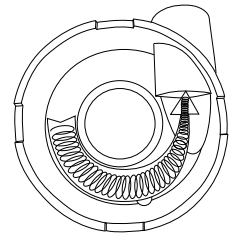

MK-IXL 5-inch Full Vacuum Shroud

The MK Diamond IXL 5" Full Vacuum Shroud is for concrete and surface grinding dust control. The shroud easily attaches to a vacuum or dust extractor resulting in a cleaner working environment and increasing visibility during grinding. It captures airborne particles thus protecting workers from dangerous crystalline silica.

The MK-IXL 5" full vacuum shroud is easy to install on popular grinders.

- Developed for grinding concrete, masonry and mortar
- Increases cup wheel life by removing abrasive dust
- Dust control reduces clean up time and provides better visibility for operator
- Designed for use when cleaning, leveling spots, removing epoxies, urethanes, paint and other coatings
- Fits popular 4"-5" hand grinders

Cyclone Dust Extraction System

The IXL shroud's snail shape design utilizes the air velocity created by the rotating grinding wheel to efficiently channel dust particles away from the work surface and into the vacuum port. This technology results in less airborne dust, less cleanup and improved grinding efficiency.
